

MUCK DESTROYER TABLETS

Muck Destroyer Tablets are an all natural probiotic designed to target the muck (organic) buildup on the bottom of lakes and ponds. They enhance the muck layer with beneficial bacterial cultures and enzymes to promote the rapid degradation of organic debris.

10 LB PAIL

DOSAGE INSTRUCTIONS

STORE IN A COOL, DARK PLACE.

INITIAL DOSE: For best results, begin treatments in the early spring when temperatures rise above 50°F. Broadcast the tablets evenly over the targeted area. Each container treats 50' x 20' area 5 times.

MAINTENANCE DOSE: Apply 2 pounds of tablets per 1000 sqft. Reapply every 2-4 weeks as needed.
